KOHLER

OnCue® Generator Management System

Peace of mind. In the palm of your hands.

Whether at home or on the go, you're in control. With the OnCue system, you can manage your KOHLER® generator system, remotely control items in your home, receive updates via text or email, view real-time power operation and more – from anywhere in the world.*

Standard OnCue System Features

- Text messages or email updates – immediate notifications sent to your smartphone
- View entire system on one screen – genset, automatic transfer switch, Load Control Module (LCM)** and programmable interface module**
- Start/stop control from your computer
- Time-stamped history of starts, stops, faults and notifications
- Automatic control of home when generator set is paired with a Programmable Interface Module (PIM) – remotely turn on or off appliances, outdoor lighting, storm shutters, etc.

New on 14/20RES(A) and 48RCL Models

- Easier setup and installation – simply download OnCue at KohlerPower.com/OnCue***
- Better email access – receive instant alerts without keeping your PC on
- Expanded coverage now available to monitor multiple generators on one screen
- Compatible with any KOHLER generator equipped with an RDC/DC or RDC2/DC2 controller

* Remote monitoring available anywhere there is broadband internet service and/or cellular phone service.

** If system is equipped with these optional accessories.

*** RDC/DC controllers require an Ethernet board installed on the generator controller.
